3D PRINTING HITS THE MAJOR LEAGUES

Dimension Works Prints 3D Logos For LA Dodgers Helmets

Ocala, FL, April 13, 2016– Dimension Works has helped bring creative thinking to life for the LA Dodgers. At their Home Opener on April 12th, the Dodgers featured a new look on their batting helmets. The matte blue helmets, featuring a 3D printed LA logo, are a first for Major League Baseball. This fresh new look was a collaborative effort between Dimension Works and Pro Helmet Decals.

When the Dodgers wanted a new look, they asked Pro Helmet Decals to help. Pro Helmet Decals partnered with Dimension Works to bring the idea of a 3D logo to life. Dimension Works was able to scan the helmet to capture the right curvature and then design the logo in 3D to give it depth. After designing the logos, Dimension Works printed them on their EnvisionTEC Ultra 3SP Printer. They also painted them matte white to complete the fresh new look for the helmets.

“We were so excited to work on the LA batting helmet logos. This was a perfect project for us. Not only did it highlight our capabilities in scanning, design and printing, it showcases what 3D printing can do for innovation.” – Jeff Beegle, President of Dimension Works

3D Printing is changing the way products are being manufactured. It has already been used to shorten time to market, but now 3D Printing is producing custom, end use parts. The LA batting helmet logos are just one of

many examples where custom parts can be produced. Dimension Works is working with manufacturers across multiple industries to help them bring this type of creative thinking to life.

Dimension Works is a full-service 3D firm committed to helping manufacturers and innovators bring ideas to life. Founded in Ocala, Florida, we are your partner for CAD & Design, 3D Scanning, Rapid Prototyping and 3D Printing Equipment Sales. For more information, please visit www.dimension.works.
