

Micro Material

ABS Flex M Series

EnvisionTEC's new ABS Flex M Series is an extremely flexible ABS-like 3D printing material for Perfactory® Micro technology. ABS Flex M is an ideal solution for a wide variety of applications including snap-fit items, assembly applications, and living hinges which require some elasticity. It is a tough material, suitable for high quality prototypes of items in categories such as automotive and consumer goods as well as stable enough for production-quality end use parts. ABS Flex M is ideal for any application which requires a material capable of holding high stress and force. It is also capable of very high speed builds, allowing for large models to be built in under a day without sacrificing its exceptional surface quality.

Material Properties*	
Description	After post curing 5 min x 2
Tensile Strength	65 MPa
Tensile Modulus	1772 MPa
Elongation at Break	6.6%
Flexural Strength	108 MPa
Flexural Modulus	2543 MPa
Colors Available	ABS Flex Black M, ABS Flex Gray M

*All data provided is preliminary data and must be verified by the individual user.

Recommended Machines
Perfactory® Micro EDU, Perfactory® Micro XL

Applications
Aerospace, Animation and Entertainment, Architecture and Art, Automotive, Consumer Packaged Goods, Education, Electronics, Manufacturing, Sporting Goods, Toys
